SUMMARY

Software Engineer specializing in Front-End and Cross-Platform Mobile Development with React Native, Expo, Next.js (React), and TypeScript (TSX). A collaborative project contributor with full stack training focused on delivering Responsive UI/UX and RESTful API integrations. Eager to leverage technical expertise and creativity to build high-impact, scalable software solutions.

TECHNICAL SKILLS

- **LANGUAGES:** TypeScript, JavaScript (ES6), TSX, JSX, HTML5, CSS3, Python, SQL, Java
- **FRAMEWORKS & LIBRARIES:** React Native, Expo, React, [Next.js](#), Vite, NativeWind, TailwindCSS, Node.js, Express, Flask
- **DATABASES:** MongoDB, MySQL
- **CLOUD & TOOLS:** EAS Build, Xcode, Android Studio, Figma, Cloudflare R2, Render, Vercel, Git, GitHub, Postman, Jira

TECHNICAL PROJECTS

Track My Chores, Front-End Mobile Engineer (Expo, React Native, JavaScript, JSX)　　　　　[Presentation](#) | [GitHub](#)

A mobile task management app with parent and kid interfaces　　　　　　　　　　　　　　　June 2025 - Present

- Engineered 30+ unique screens with 2 distinct user interfaces using JavaScript (JSX), React Native, and NativeWind, leveraging Expo to deliver a high-performance, responsive experience for parents and kids on iOS and Android
- Translated 60+ high-fidelity Figma mockups into pixel-perfect React components, streamlining design-to-development workflow and reducing front-end iteration time
- Implemented light and dark modes with responsive layouts, improving accessibility and consistent user experience across devices
- Collaborated with back-end engineer via GitHub to integrate MongoDB, Node.js + Express, Cloudflare R2 for photo storage, JWT authentication, push notifications, transactional emails, and Agenda cron jobs, enabling secure, scalable, and automated task management
- Delivered features through Agile workflows, weekly client consultations, and daily team syncs, accelerating development speed and ensuring alignment with client expectations

Yosemite Reservations, Full Stack Engineer (Next.js, TypeScript, TSX, Node.js, MongoDB)　　　[Deployed Link](#) | [GitHub](#)

A responsive full-stack app for booking Yosemite campsites with NPS API integration　　　　　　　　July 2025

- Engineered a full-stack Next.js (React) and TypeScript application using TSX and Tailwind CSS for a type-safe frontend, with a Node.js/Express backend for Yosemite campsite reservations
- Implemented CRUD functionality for user reservations via a RESTful Express API, enabling users to create, view, edit, and delete reservations securely and efficiently
- Integrated data from the National Park Service public API, displaying real-time park information with custom React components, enhancing user experience and engagement
- Orchestrated end-to-end deployment using Vercel (frontend), Render (backend), and MongoDB Atlas, with a GitHub monorepo setup to enable automated updates and seamless continuous integration
- Secured authentication with JSON Web Tokens stored in browser cookies, ensuring protected access to user accounts and reservation management

Closet Organizer, Full Stack Engineer (Vite, JavaScript, JSX, [Node.js](#), MongoDB)　　　　　[Deployed Link](#) | [GitHub](#)

A responsive full-stack application for organizing clothes with a custom REST API　　　　　　　　June 2025

- Engineered a full-stack MERN application utilizing JavaScript (ES6+) and JSX within a Vite-powered React frontend, styled with Tailwind CSS and backed by a Node.js/Express server to deliver a responsive, intuitive digital closet experience
- Implemented CRUD functionality for clothing items via a RESTful Express API and designed front-end components to display item details (size, brand, color, category), improving wardrobe management and reducing daily inefficiencies

- Collaborated with another engineer via GitHub to develop the full-stack application, coordinating on both front-end and back-end features to deliver a cohesive, user-friendly digital closet experience
- Secured user accounts and authentication using JSON Web Tokens stored in browser cookies, ensuring protected access to personal wardrobe data
- Orchestrated end-to-end deployment with Vercel (frontend), Render (backend), and MongoDB Atlas, connected through a GitHub monorepo for automated updates and continuous integration

PROFESSIONAL EXPERIENCE

FP Movement, Tiburon, CA

Assistant Manager   January 2025 - Present
- Acted as Manager on Duty, delegating operational tasks and floor zones to stylists, ensuring 100% completion of daily sales and service goals
- Managed opening/closing procedures, cash handling, inventory, and attended weekly management meetings to analyze sales forecasting and payroll, optimizing staffing and store profitability
- Trained and coached 10+ new stylists, improving floor productivity and customer satisfaction, contributing to a measurable increase in monthly sales performance
- Consistently exceeded personal and team sales goals while delivering exceptional customer service, resulting in repeat clientele

Red Dragon Yoga, San Rafael, CA

Assistant Manager   October 2023 - January 2025
- Managed daily operations of a hot yoga studio and retail storefront serving 150+ clients per day, maintaining high customer satisfaction and smooth operations
- Oversaw customer support emails (20+ daily) and directed email marketing campaigns (3+ weekly), improving client retention, sales, and community engagement
- Planned and executed special events including workshops, teacher trainings, sound baths, challenges, holiday events, and sales, increasing participation and revenue
- Assisted team in adopting and executing software tools (Zoom, GSuite, Asana, Loom, Mindbody, Slack, Brandbot) to improve operational efficiency and internal collaboration

Throckmorton Partners Real Estate Investments, Mill Valley, CA

Executive Assistant   January 2022 - October 2022
- Oversaw logistics, finances, and execution of a large-scale house expansion construction project, ensuring timely completion and budget adherence
- Built and maintained a vendor contact database of 50+ local providers, streamlining communication and project coordination
- Assisted principal with administrative, PR, and travel tasks, maintaining smooth operations during frequent business trips

Anyon Interior Design, San Francisco, CA

Executive Assistant   January 2021 - October 2021
- Managed office operations as main point of contact for vendors, clients, and contractors, improving workflow efficiency
- Coordinated office move and remodel as head project manager, supervising contractors and budgets
- Supported client projects by collaborating with designers and bookkeeping team, assisting with supplies, finances, and installations

EDUCATION

Coding Dojo, Colorado Technical University, Full Stack Development Certificate   October 2024 - July 2025
Immersive Full-Stack Training Program in HTML, CSS, JavaScript, Python, MERN, and Java

University of California, Santa Cruz, B.A in Environmental Studies, Minor in Sustainability Studies   June 2018
Cumulative GPA: 3.7, Cum Laude Honors, Department Honors, 5 Dean's Honors Awards
